Tatbiq HMS

Your hospital. Your server. Your data.

One system from the front desk to the final bill, built for India's clinics, nursing homes and hospitals up to 100 beds.

Front desk · Wards · Nursing · Doctor's desk · Casualty · Theatre · Maternity · Lab · Imaging · Billing · Insurance · Accounts · Payroll · 13 departments

WHY TATBIQ HMS

What an owner worries about, answered

Money that slips away, records that change, papers the law asks for, servers that stop, software that holds data hostage. Tatbiq HMS was built around those answers.

SIX ANSWERS

WHERE IS MY DATA?

On your own server, in your building

HMS runs on the hospital's server and local network. Patient data does not have to leave the hospital. Or hosted for you on our cloud, at extra charge, if you prefer.

IS MY MONEY SAFE?

Every rupee has a name, a time and a mode

Each person counts their own cash. Discounts above a limit need a named approver. Earlier days need Override. Credit is never counted as cash.

CAN RECORDS BE CHANGED?

Records keep their history

Every change keeps what it was, what it became, who and when. Final summaries and approved reports are locked; clinical records cannot be deleted.

WHAT WILL THE INSPECTOR ASK?

The Indian registers, built in

MLC with the police letter, MTP forms, PC-PNDT Form F, birth and death registers, certificates, consents and Tally day books.

WHAT IF THE INTERNET GOES?

The front desk keeps working

No internet needed on your network. If the server stops, ready paper forms carry the day and are typed in later, marked as paper records.

WHAT IF I STOP PAYING?

Your data is never held hostage

Without yearly support HMS turns read-only, and a module you drop opens read-only. Every record can still be opened, printed and exported in full.

MADE FOR

Clinics
and polyclinics

Nursing homes
with wards

Maternity units
labour room and newborns

Day-care, surgical
units with a theatre

Hospitals
up to 100 beds

1 UHID
for a patient's whole life, in every department

130+
screens for every desk, reception to payroll

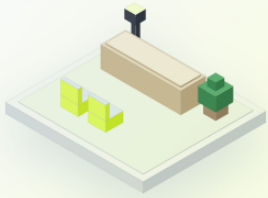
50+
reports for owners, doctors, cashiers and the CA

Unlimited
staff logins, priced by beds, not users

ONE PATIENT, EVERY DEPARTMENT

From the front desk to the final bill, on one record

Follow one patient through the hospital. Each desk sees what it needs, and nothing is typed twice.

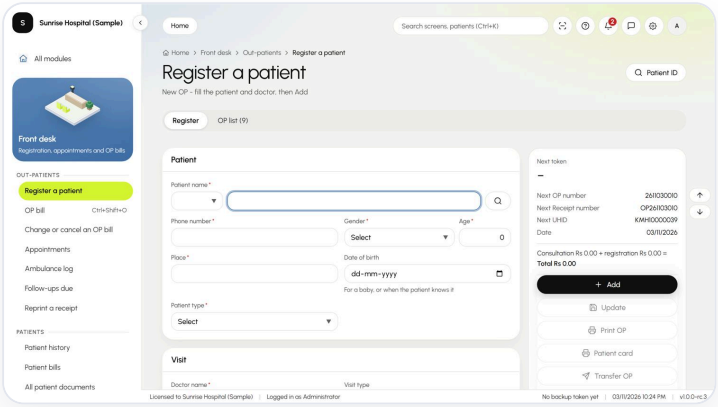


1

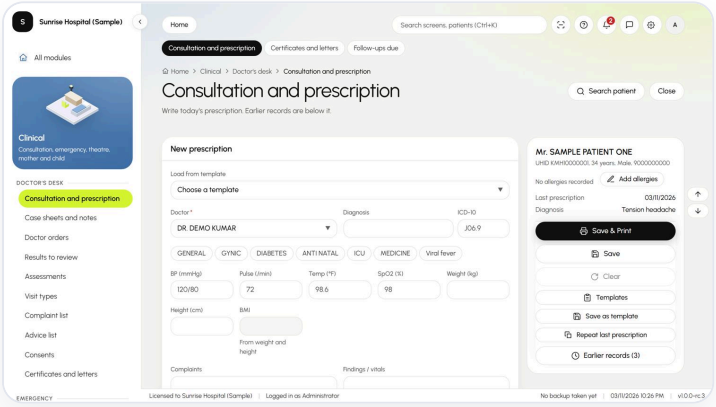
Quick registration, one patient number

Find the patient by name, mobile or UHID, or register a new one. The doctor's fee, token and OP slip follow by themselves.

- A warning before a duplicate patient is made
- Cash, UPI and card on one bill
- An unpaid stay balance shown at the desk



Register a patient



Doctor's desk

2

The doctor writes once

Prescriptions print in English, Telugu or Hindi on the doctor's own pad design. Tests ordered here reach the lab's billing list at once.

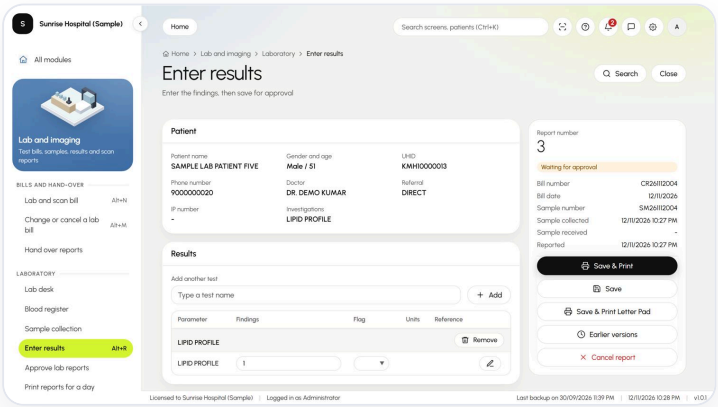
- Case sheets, notes and certificates
- Saved templates for common conditions
- Follow-up dates and a list of patients due

3

Lab and scans, nothing released early

A barcode on every sample. Lab, X-ray, ultrasound, CT and MRI reports are released only after approval.

- Approved reports locked; a correction is added below
- Each handover notes who took the report
- PC-PNDT Form F for every pregnant woman's scan

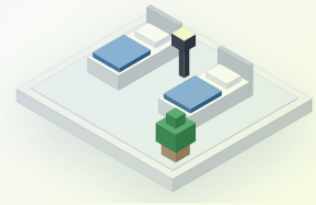


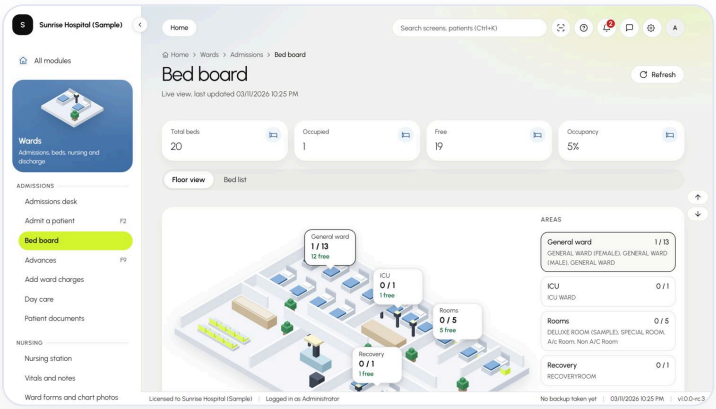
Lab results

ONE PATIENT, EVERY DEPARTMENT

Admission, nursing and discharge

The same patient record carries on into the ward, the nursing station and the final bill.





Bed board

4

Admission and the bed board

Admit from the OP visit in one click. The bed board shows every free and occupied bed on a drawing of your floors.

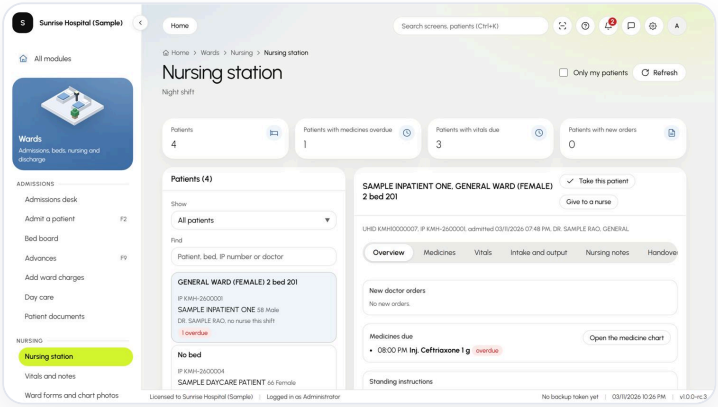
- Advances, ward charges, bed moves with history
- Room rent added every day by itself
- Day care and packages

5

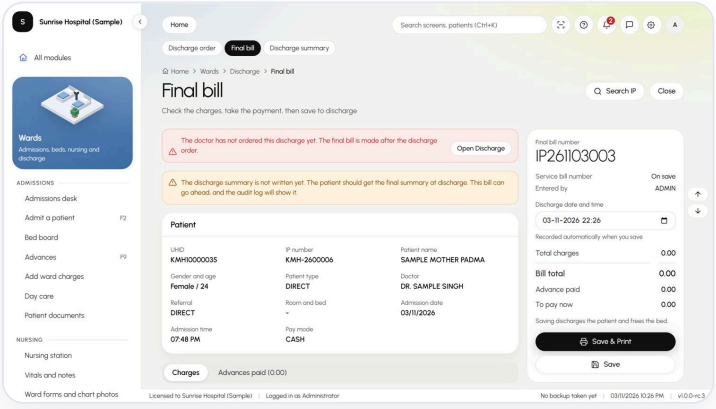
Nursing at the station

Vitals, notes, medicines given, intake and output, on registered ward computers, so patient data stays off private phones.

- Medicines and vitals due, by shift
- Handover notes
- Ward forms, and photos of filled charts



Nursing station



Final bill

6

Discharge and the final bill

The summary is filled from the stay. The final bill brings in room days, services, lab and advances; any balance stays due with the patient or insurer.

- Every advance shows on the final bill
- Insurance and TPA claims followed to payment
- A notice when a patient who owes comes again

Also on the same record: casualty with triage and the MLC register, theatre bookings with consent and the safety checklist, antenatal care, labour room, newborns, immunisation and the confidential MTP register.

MONEY AND CONTROL

See every rupee. Stop the leaks.

Money passes through many hands. Tatbiq HMS puts a name, a time and a mode on every rupee, so the owner sees what happened without asking anyone.

WHAT THE OWNER GETS

Day-end cash closing, per person

Each cashier counts their drawer against what HMS expected, mode by mode, and hands it over with a record.

Discounts with a name on them

Each role has a discount limit. Above it an approver types their own password, and the bill shows who approved.

No quiet changes to yesterday

Changing or cancelling an earlier day's entry needs Override. Only the person who took the money can cancel it. Reprints say Duplicate copy.

Charges that reach the bill

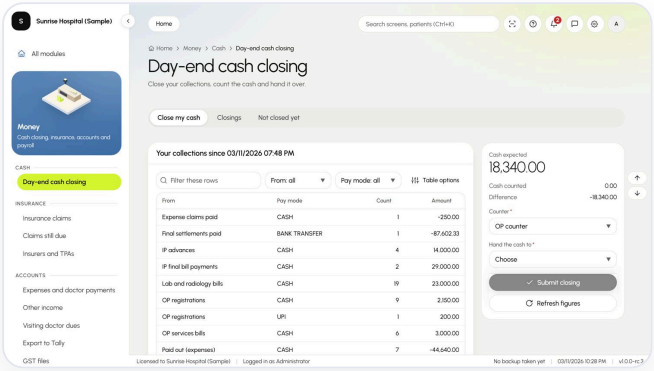
Room rent is added daily, and doctors' test orders wait for billing until they are billed.

Dues followed up

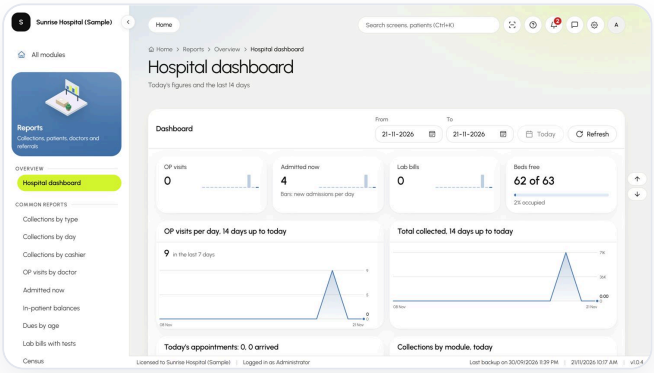
Balances from patients, insurers and schemes stay open until they are received. Dues by age and the census open the lines behind each figure.

Clean files for your CA

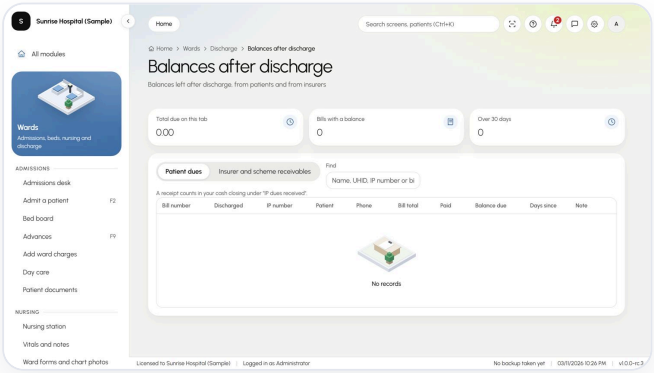
Tally day books that match the day-end cash, expenses, visiting doctors' share worked out from the bills, and payroll with PF, ESI, PT and TDS.



Day-end cash closing



Hospital dashboard



In-patient dues, from patients and payers

Your numbers, every evening. A daily, monthly and yearly summary reaches the owner by e-mail, and the dashboard shows today's collections, beds, lab work and dues at a glance.

BUILT FOR INDIA

The paperwork the law asks for, already in place

Registers and forms ready when the inspector, the police or the registrar asks.

REGISTERS AND FORMS

MLC register
Medico-legal cases with the police intimation letter

PC-PNDT
Form F for every pregnant woman's scan, register and monthly report

MTP
Confidential register with Forms I and II, behind its own permission

Births and deaths
Registers with the date due to the registrar

Certificates and consents
Certificates; consent forms with the signed paper attached

Accounts for the CA
Tally day books, expenses and a monthly summary

SAFE, AND ALWAYS ON

ABDM link, planned
ABHA at the front desk and records shared with the patient's consent (ABDM milestones 1 to 3) are built. They will be offered once NHA certification is complete.

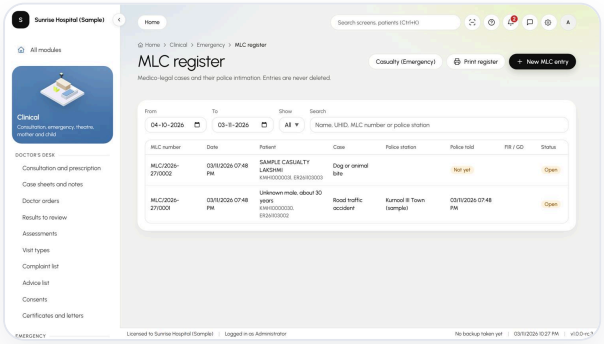
Patient data protected
Each login sees only its own work. Who opened a record is logged. A picture code at sign-in, and two-step login for the staff you choose. Our support login stays off until you switch it on.

A log no one can rewrite
The change log is sealed every minute, with a copy of the seal kept outside the database, so tampering shows.

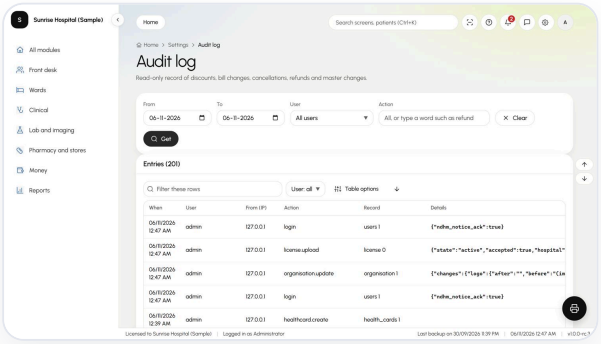
Backups you can trust
Encrypted backups twice a day, a copy to a second disk, and an alert if a backup fails.

A plan for the bad day
Ready paper forms for every desk, and a back-entry mode that marks paper records typed in after a downtime.

Records, not advice
HMS keeps, prints and shares records. It gives no clinical advice, so the medical judgement stays with your doctors.



MLC register

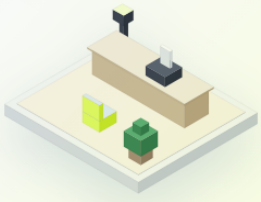


Audit log with the seal check

MODULES AND PLANS

Start with what you need. Grow when ready.

Both versions include the front desk, billing, patient records and reports. Add the departments your hospital runs.



MODULES

Front desk
Registration, appointments, OP bills, follow-ups

In-patients
Admission, beds, advances, discharge, final bill

Nursing
Vitals, notes, medicine chart, intake and output

Doctor's desk
Prescriptions, case sheets, orders, certificates

Casualty
Triage, treatment, MLC, admit in one click

Theatre
Bookings, consent, safety checklist, notes

Maternity
Antenatal, labour, newborn, births, MTP

Laboratory
Samples, results, approval, hand-over

Radiology
X-ray, USG, CT, MRI reports, PC-PNDT

Insurance and TPA
Claims, payers, outstanding, receipts

Stores
Indents, orders, issues, item lists

Reports
Dashboard, 50+ reports, owner e-mails

TWO VERSIONS, PRICED BY BEDS

Lite
OP, IP and lab

For clinics and small hospitals whose staff need one dense screen for each task.

Core
More included

Lite plus the doctor's desk, nursing station, owner e-mails and accountant pack.

Priced by beds
Under 25, 25 to 75, above 75

One-time licence and onboarding, then yearly support.

Custom
Quoted

More than one site, our cloud, or extra modules.

ADD-ONS, AT EXTRA CHARGE

13 departments
Skin clinic, physiotherapy, paediatrics, diagnostic centre, dialysis, AYUSH, dental, eye clinic, chronic care, ENT, orthopaedics, diet and weight, day-care procedures.

Hospital services
CSSD, kitchen diet orders, mortuary register, housekeeping tasks. Accounts and payroll too.

Linked products
Pharmacy through PHARVILO; the SaffQ queue and online booking; the ABDM link (planned)

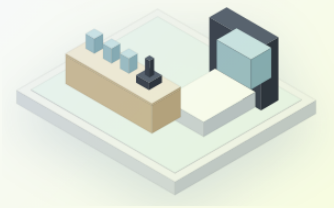
One-time licence, then yearly support from the second year. **Unlimited logins.** On your server, or on our cloud at extra charge.

Ask for the price list for your hospital

TESTED BEFORE IT REACHES YOU

Built carefully. Tested every release.

Every release of Tatbiq HMS goes through the same checks before it is installed at a hospital.



2,700+
automated checks on billing, records, permissions and money rules

156
screen tests in the browser, including accessibility

60
staff at the same time in our load test on one server

1 year
of a busy hospital's data: busy screens open in about a tenth of a second

M1 to M3
ABDM milestones built; NHA accepted our test reports, November 2026

Signed
releases that refuse to start if any file was changed

HOW WE START AT YOUR HOSPITAL

1. **Free trial**
A demo with your formats, then 30 days free at your hospital.

2. **Install**
Set up on your server from our install drive, with your licence.

3. **Your setup**
Doctors, rates, beds and logins; patients brought over from the old system.

4. **Go live**
Desk by desk training, on-site checks, then go live with support.

AFTER YOU GO LIVE

Support and updates
Phone and e-mail, Mon to Sat, 9 am to 7 pm. Updates and licence renewal.

Training and help
Training at each desk, videos in Telugu and Hindi, and F1 help on every screen.

Your data stays yours
A full export is always open, and you are never locked out.

See Tatbiq HMS at your hospital

Book a demo with your own bills and reports. We come to you.
